In the claims:

Claims 3, 5, 7 and 8 have been amended as follows:

3. A transformant carrying the DNA according to claim 1 [or the vector according to claim 2].

5. A method for producing [the] a protein [according to claim 4], said method comprising the steps of culturing the transformant according to claim 3 and recovering the expressed protein from said transformant or the culture supernatant thereof.

7. A method of screening for a compound which binds to [the] a protein [according to claim 4], said method comprising the steps of:

(a) bringing the protein according to claim 4 into contact with a sample to be tested, and

(b) selecting a compound having the activity to bind to the protein [according to claim 4].

8. A method for detecting or measuring [the] a protein [according to claim 4], said method comprising bringing the antibody according to claim 6 into contact with a test sample [that apparently contains the protein according to claim 4], and detecting or measuring the formation of an immune complex of said antibody and [said] a protein that specifically binds said antibody.
